Mary Alice Rose's interest in science and technology led to a 20-year career in different areas of applied physical science. Her work ranged from a meteorologist for the National Severe Storms Laboratory to a manager developing the ground system for the Hubble Space Telescope. In 2002, Rose made the transition from manager, engineer, and earth scientist to the full-time ministry as a Christian Science practitioner. She is now an authorized teacher of this Science and a member of the Christian Science Board of Lectureship. Rose travels from her home in Brookeville, Maryland. This lecture is sponsored by Ninth Church of Christ, Scientist, Spring, TX.
